

ALPACA FIBER FILLED BIRD NESTING BALLS

Alpaca fiber is perfect for birds to use in building their nests. It is very soft, warm and doesn't retain moisture and has no smell. When it gets wet it dries quickly so the alpaca fiber fluffs up again and stays soft.

If you love birds, you will enjoy watching nature at work as the birds pull the fiber from the grape vine ball.

These Bird Nesting Balls are hand crafted by the youth of the Cumberland County 4-H Alpaca Club. All proceeds from the sale will be used to build obstacle courses for training there alpacas. They sell for \$5.00 each and additional balls are available by contacting any of the alpaca farms listed below.

If you have a daycare, Boy Scout group, Girl Scout group, youth group or any other interested group, you too can make these nature friendly items. Your group can feed the alpacas, walk the alpacas and make a nesting ball for \$8/person.
